- **Only \$55.00 to attend**
- **Boxed lunches and light breakfast will be provided**
- **For those who have and have not attended before**

The number of children with challenging behaviors is on the rise. Traditional approaches to modifying these behaviors are largely unsuccessful leaving educators often feeling overwhelmed and frustrated. Conscious Discipline® scientifically and practically links social-emotional learning and classroom management to achieve school-wide success. Conscious Discipline® a journey towards learning and teaching self-regulation. It offers alternative approaches allowing us to change schools and classrooms from the traditional structure of reward and punishment to what is metaphorically referred to as a School Family™. This model, based on safety, connection and problem solving creates a climate that bully-proofs our classrooms and optimizes brain development for physical, social, emotional and academic success.

If you have been to a Conscious Discipline® workshop before, Overcoming Classroom Challenges and Bullying with Conscious Discipline® will increase your understanding, expand your knowledge and assist in its implementation. If you have never attended a Conscious Discipline® Workshop, this is an opportunity to begin changing your life and the lives of those around you for the better. This workshop is designed for anyone who works with children of any age from birth through high school although most examples shown will be of preschool and elementary age.

* **In order to receive a certificate for attendance, workshop registration must be processed no later than Wednesday, February 29th**
